COLOR PALETTE

PRIMARY

- Lime Accent #97E635
- Foreground #F4F5FA

NEUTRAL STACK

- Base BG #0B0D14
- Card Surface #131620
- Secondary #1A1E2A

RISK SEMANTIC SCALE

SAFE · LOW · WARN · HIGH · CRIT

Color is always semantic, never decorative. Do not use risk colors for non-risk UI.

TYPOGRAPHY

Space Grotesk 700 · 40px · H1

CostGuard

Space Grotesk 600 · 24px · H2

Preflight Analysis

Space Grotesk 600 · 8px · Card Label

TOKEN USAGE

Space Grotesk 400 · 10px · Body

Run analysis before deployment. Unpredictable token costs and silent truncation are preventable.

Geist Mono 400 · 9.5px · Data

4,218 tokens · $0.0084 · 62.1%

LOGO USAGE

✓ CORRECT
Dark background only

✕ LIGHT BG
Never on light surfaces

✓ CLEAR SPACE
Min. 5px padding on all sides

✕ DISTORTED
Never stretch or crop

SPACING SYSTEM

4px	Inline
8px	Intra
16px	Component
32px	Card pad
64px	Section

No ad-hoc values. Only approved scale tokens.

UI USAGE — RISK BADGE SCALE

Semantic risk colors applied as they appear in-app. Color communicates state, not decoration.

● Safe · ● Low · ● Warning · ● High · ● Critical

FAILURE RISK SCORE
Context pressure + instruction ambiguity + output collision

67

DESIGN PRINCIPLES

Clarity Information is immediately scannable. No cognitive tax.

Precision Data is presented without interpretation bias. Numbers are exact.

Authority Visual restraint conveys trust. Developers don't need flash.

Restraint No visual noise, no decoration without function.

MOTION RULES

Max 200ms · No loops · No parallax
Motion communicates state, never decorates

VOICE & TONE

WRITE LIKE THIS

- → Precise, direct, no fluff.
- → Use exact numbers. "4,218 tokens" not "thousands of tokens."
- → Confidence through specificity. State facts.
- → Treat readers as technical operators.

NEVER WRITE LIKE THIS

- ✕ Marketing superlatives ("best," "revolutionary").
- ✕ Emoji in functional UI or documentation.
- ✕ Vague risk language ("might fail," "could be an issue").
- ✕ Hedging. State the risk, name the score.
